In re Application of:	:	
LEE <i>et al.</i>	:	DECISION ON PETITION
Serial No.: 10/607,945	:	TO MAKE SPECIAL
Filed: June 27, 2003	:	
Attorney Docket No.: 1014-SP219	:	

This is a decision on the petition under 37 C.F.R. § 1.102, filed January 05, 2004, to make the above-identified application special.

Petitioner requests that the above-identified application be made special under the accelerated examination procedure set forth in Manual of Patent Examining Procedure (M.P.E.P.), Section 708.02, Item IX: Special status for patent applications relating to superconductivity.

A grantable petition to make an application special under 37 C.F.R. § 1.102, and in accordance with M.P.E.P. § 708.02, Section IX, for an invention that relates to superconductivity materials, should be accompanied by a statement under 37 CFR 1.102 that the invention involves superconductive materials.

Accompanying the petition is a statement by Jeffrey Abel that the invention involves superconductive materials.

For the above stated reasons, the petition is GRANTED.

The application is being forwarded to the examiner for expedited prosecution.

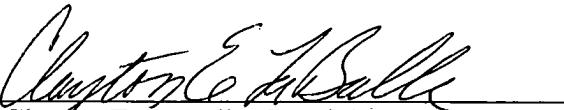

If the examiner can make this application special without prejudice to any possible interfering applications, and he/she should make a rigid search for such, he/she is authorized to do so for the next action. Should the application be rejected, the application will not be considered special for the subsequent action unless the applicant promptly makes a bona fide effort to place the application in condition for allowance, even if it is necessary to have an interview with the examiner to accomplish this purpose.

If the examiner finds any interfering application for the same subject matter, he/she should consider such application simultaneously with this application and should state in the official letter of such application that she is taking it out of its turn because of possible interference.

Should an appeal be taken in this application or should this application becomes involved in an interference, consideration of the appeal and the interference will be expedited by all Patent and Trademark Office officials concerned, contingent likewise upon diligent prosecution by the applicant.

After allowance, this application will be given priority for printing. See M.P.E.P. § 1309.

Inquiries regarding this decision should be directed to Clayton LaBalle at (571) 272-1594.
